## "High Performance Solutions for Fusion Centers"

Agisent's Fusion Center solutions provide real-time access to law enforcement data throughout a specific region, county, or state. Data is replicated by all reporting law enforcement agencies and immediately accessible using high-speed searching, filtering, and reporting. Extensive watch and notification functions are also provided.

Key Features

- Real-time integration of reporting data from any law enforcement agency

- Securely query, print, and export information

- Enhanced data available from law enforcement utilizing Agisent RMS systems

- Real-time watches and notifications

- All queries are logged and authenticated

- Complex queries can be "named" and saved for later re-use

- Multi-tier security, access control, and reporting

- Full transaction tracking and auditing

- User portal, agency administrator portal, and overall system admin portal

- Real-time dashboards include searches made, by whom, for what, and what were the results

- Automatically tracks non-reporting agencies

- Extensive real-time graphs, charts, and reports

- High-performance, highly-scalable, easily handles 100's of millions of records
