AIRSHIP VMS

Airship provides enterprise-grade video and data management solutions for its customers operating in highly demanding environments where failure is not an option.

**US OWNED &
OPERATED**

**GOVERNMENT
TRUSTED**

**PARTNERSHIP
BASED**

TAILORED. VIDEO. INTELLIGENCE.

TRUSTED

Airship is the Trusted Solution When Your Video, Associated Metadata Collection, and Analysis Requirements are Mission Critical to the Outcome of Your Operations.

Airship is trusted by multiple agencies across the US Government running 24/7 mission critical operations in some of the most demanding environments, along with some of the largest Fortune 100 companies running global operations originating back to a single Global Security Operations Center.

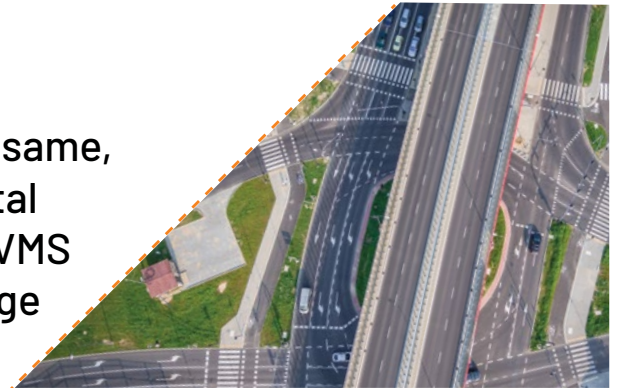

TAILORED. VIDEO. INTELLIGENCE.

WHAT WE DO

In a saturated market of copycat competitors, Airship's VMS Platform and Solutions stand above the rest with customization options.

One Size Does Not Fit All

Airship recognizes not every customer is the same, nor is every operating environment. Bare metal versus virtual, on-premise versus the cloud; VMS limitations should not dictate how you manage your network. We work where you do.

No Bolt-Ons Allowed

Airship works with third-party analytics and sensor manufacturers to integrate their platform into ours, ensuring that the interface and workflow is seamless and efficient.

When Failure Is Not An Option

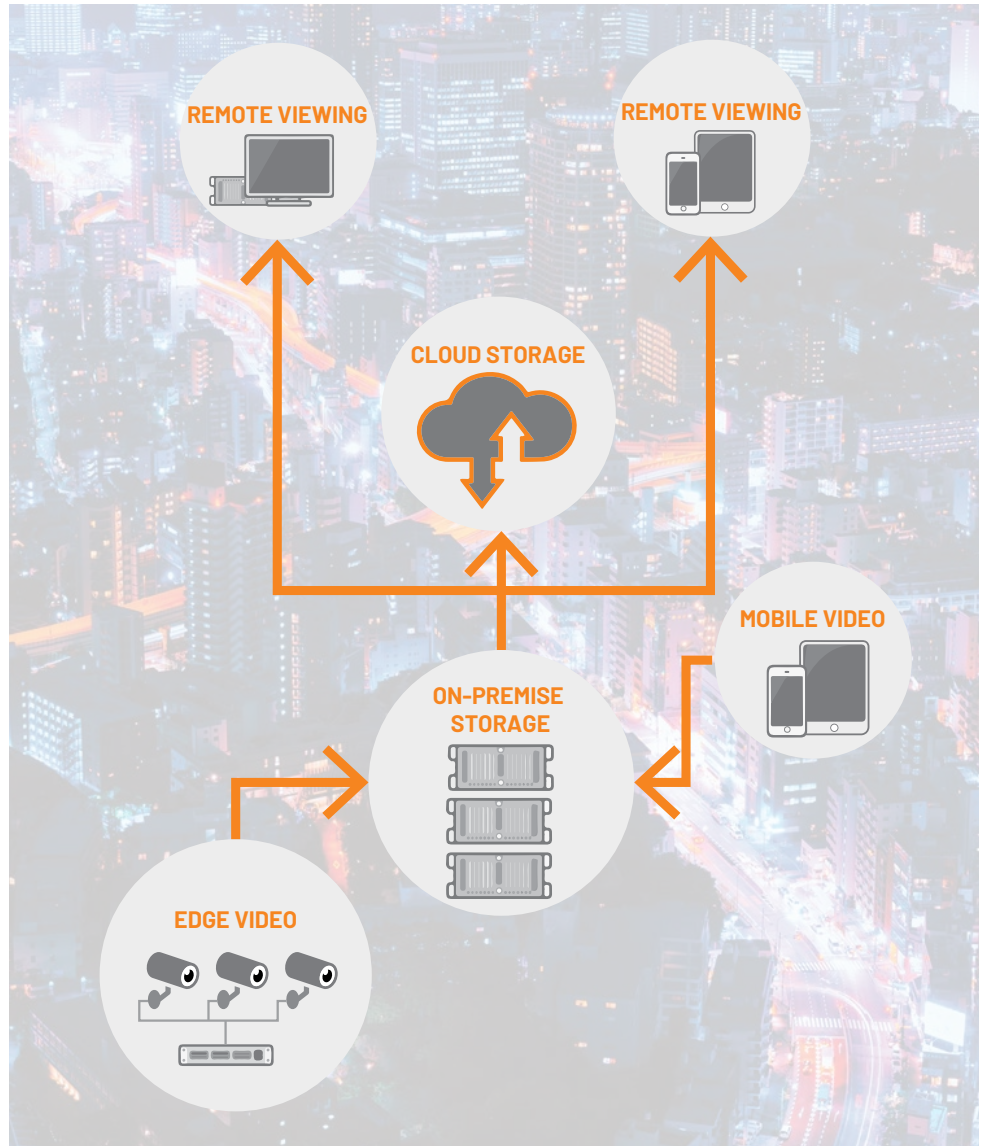

Airship just works, all the time. With built-in failover supporting planned and or unplanned downtime, Airship is ready for the challenges the real world throws at you.

TAILORED. VIDEO. INTELLIGENCE.

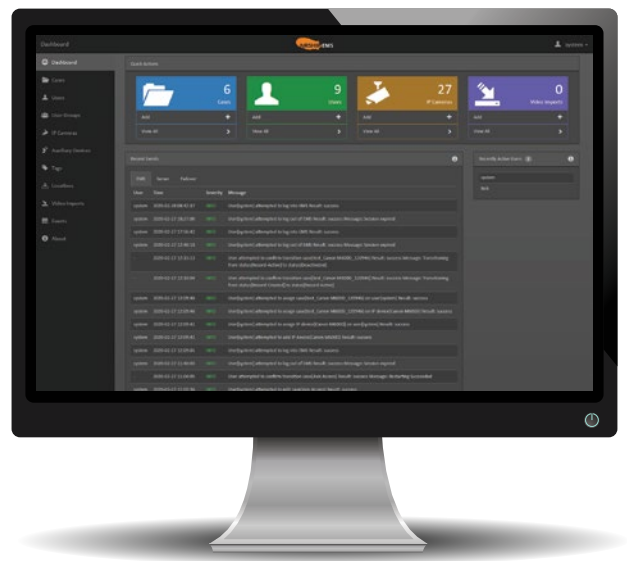

**FLEXIBLE,
SCALABLE,
TAILORED &
EFFICIENT.**
**AIRSHIP IS
THERE WHERE
AND WHEN
YOU NEED IT;
ALL THE TIME,
ON TIME.**

AIRSHIP EMS

You manage operations around the world in complex and challenging environments; shouldn't your video management system support that mission?

Airship's Enterprise Management System (EMS) provides federated management of cameras and sensors, from ten to tens of thousands, deployed in a single location to every country across the globe, all from a single interface.

EMS HIGHLIGHTS:

- ✓ System Administrator Dashboard for Adding and Managing Sensors
- ✓ Wizard Based Interface That is Highly Intuitive and Easy to Use
- ✓ Manage Licenses, Users, Groups and Permissions Across System
- ✓ Engine That Manages Entire Airship Software Ecosystem
- ✓ Scales from Ten To Tens-of-Thousands of Cameras and Sensors
- ✓ Management Console for Video Archiving and Failover Events
- ✓ Provides Audit Log Reports for All Primary Activities on System

TESTED

VALIDATED

AUTHORIZED TO OPERATE

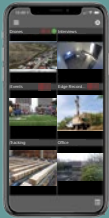

YOUR DATA

WHEN YOU WANT IT

HOW YOU WANT IT

Airship Nexus viewing client options allow you real-time and playback access to all your data via an iOS / Android secure application, our web-based thin client GUI, or a full featured thick client GUI with advanced functionality.

NEXUS MOBILE CLIENT

- ✓ Runs on iOS and Android Based Handheld Devices
- ✓ Supports Multi-Factor Authentication for Secure Remote Viewing
- ✓ Provides Live and Playback Streaming Capabilities with Full PTZ

NEXUS THIN CLIENT

- ✓ Provides Remote Web Based System Access
- ✓ Supports Most Common OS Browsers Using SSL Connection
- ✓ Provides Robust Camera Viewing, PTZ, and Export Capabilities

NEXUS CLIENT

- ✓ Full Featured Command and Control Application for Airship EMS
- ✓ Provides Single Pane of Glass for All Airship Connected Sensors
- ✓ Alarm Management Platform for Connected Sensors and Cameras
- ✓ Supports Third-Party Analytics / Applications Running in Background
- ✓ Integrated ESRI Mapping for Real-Time Sensor Situational Location

TAILORED. VIDEO. INTELLIGENCE.

UNCONSTRAINED NETWORKS WITH LIMITED DATA PLANS ARE IN THE PAST; EFFICIENT VIDEO ON-DEMAND IN DIVERSE ENVIRONMENTS IS THE FUTURE

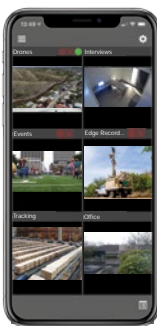

Airship Outpost / Nexus Mobile Encoder provide user-defined bandwidth streaming options for video/metadata from the edge over iOS and Android platforms, or through Outpost Edge Devices.

OUTPOST HIGHLIGHTS:

- ✓ Runs On Small Form Factor Hardware Device at The Edge
- ✓ Pulls Video Stream from Most Industry Standard Cameras
- ✓ Streams Encrypted Video to Remote Server Via RF Backhaul
- ✓ User Definable Transmission Bitrate and Resolution for Video
- ✓ High Resolution Records Locally to Device for Later Download

NEXUS MOBILE HIGHLIGHTS:

- ✓ Runs on iOS and Android Devices
- ✓ Download from App Store / Marketplace
- ✓ Streams Encrypted Video and Audio to Remote Server
- ✓ User Definable Transmission Bitrate and Resolution for Video
- ✓ High Resolution Records Locally to Device for Later Download
- ✓ Streams GPS Metadata for Live Device Tracking While Activated

SENSORS & METADATA

Video is nice, but what about all the other sensors and metadata available that enable operations and provide total situational awareness?

Airship natively integrates with a wide range of sensors at the edge, allowing the user to see all of the metadata available at the edge, including radar, radio, ground sensor, tracking device, and related sensors that operate in your environment.

SUPPORT

When things don't go right, who should you call and where do you start; the camera manufacturer, the DVR/NVR manufacturer, or the VMS company?....

Airship provides a wide range of support options, including 24/7/365 "Lens-to-Server" support where Airship can troubleshoot issues starting at the edge and working all the way back to the VMS, all via a single number and a single technician. When we find a problem, we fix it, we don't hand you off, including hardware warranty and RMA support.

HEALTH MONITORING

TECHNICAL SUPPORT

IN-HOUSE DEV TEAM

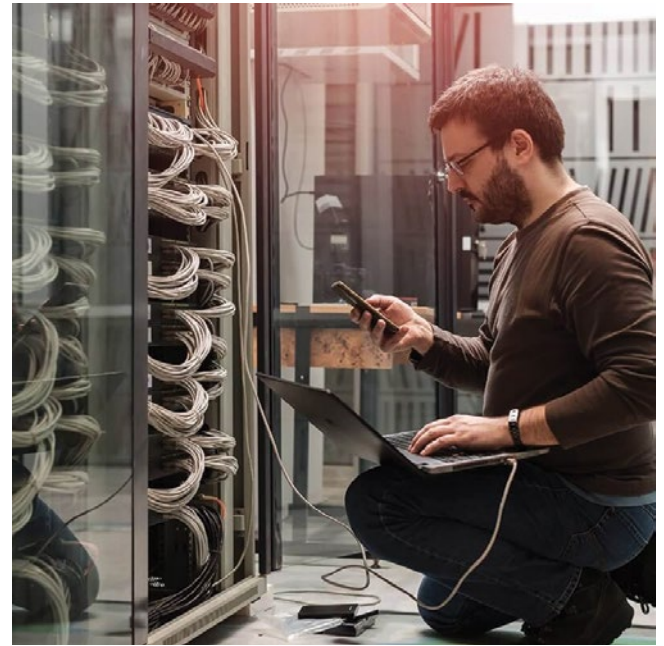

TRAINING

TAILORED. VIDEO. INTELLIGENCE.

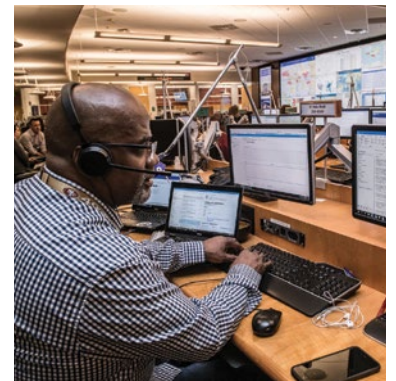

PROFESSIONAL ASSISTANCE

Sometimes you need more than a wire puller and camera hanger; you need a trained team of professionals who can help you scope out your entire project.

Airship provides a variety of technical services such as hardware infrastructure and storage, cloud solutions and their role in your environment, cameras and sensors, as well as what metadata can be collected. Airship also provides the same level of services for installation, training, and post-deployment operations where on-site cleared and trained technicians can help make your operations more efficient.
