

Attenti Analytics

Attenti Analytics is a comprehensive software suite that analyzes the historical tracking data of participants to determine trends of behavior, both positive and negative. The analytics engine examines specific criteria to determine compliance. They include, but are not limited to, the number of alerts, time in violation outside of inclusion zone, time in violation inside of exclusion zone, and battery charging time. Analytics also provides a visual representation of travel/stop patterns.

Specifications

Attenti Analytics is fully accessible from any web-enabled computer, tablet, or device. The only software required is an Internet browser, such as Internet Explorer, Google Chrome, or Firefox. No software or add-ons are required, and the software is tested against the browser versions currently supported. Attenti Analytics is upgraded regularly as enhancements are released.

- **Scoring** – enhances efficiencies of program operations, allows officers to focus their efforts and gives direct feedback to encourage compliance.
- **Trend Analysis** – each participant assigned a daily compliance score based on behavior; customizable dashboard settings based on agency preferences.
