

Antenna Plus: Mobile / Vehicle Antenna Solutions

STANDARD CABLE LENGTHS FOR MOBILITY ANTENNAS ARE 15 FEET FOR BOLT MOUNT AND ADHESIVE MOUNT ANTENNAS, AND 10 FEET FOR MAGNETIC MOUNT ANTENNAS. CURRENTLY THERE ARE NO ADHESIVE MOUNT OR MAGNETIC MOUNT VERSIONS AVAILABLE FOR THE MULTIMAX SHARKFIN ANTENNA LINE.

Pricing will increase for the following customizations:

- Cable length of 20-35 feet: Add \$10 per cable to MSRP (and apply applicable discount % for customer type)
 - Custom bolt lengths: Add \$10 to MSRP (and apply applicable discount % for customer type)
 - Built in metal ground plane version: Add \$10 to MSRP (and apply applicable discount % for customer type)
 - Adding Mesh Sleeve around ALL cables (including GPS). Add \$10 to MSRP (and apply applicable discount % for customer type)
- Note that for antennas with 3 or more cables, the mesh sleeving comes standard around the Cell/LTE and WiFi cables, but not GPS. The GPS is always separate in the standard SKUs.

ALL CUSTOMIZED ANTENNA ORDERS ARE NON-CANCELLABLE / NON-RETURNABLE (NCNR)

CENTURION Next - Quad 5G (600MHz to 6GHz) Antennas
