VuVault Cloud Share Portal

Cloud Share Licenses for the VuVault on-premise Software Solution are available for purchase and include redaction, a portal to share video, and case management. Our cloud solution includes the Cloud Share Portal at no additional cost. The Share Portal is an extensive, secure and flexible portal to facilitate convenient sharing of video evidence and case files with designated and credentialed third parties. This functionality can be used on a one-off basis by the issuance of one time credentials, or can be configured to allow regular and continued access by known and trusted third parties (i.e. the prosecutor and staff). These third parties will have the option, if given privileges per share, to review and/or download files in native format to solid state memory. A proprietary player is not needed to review video after it is downloaded.
