

MEDICATION MANAGER

No more paper logs.
No more MARs.

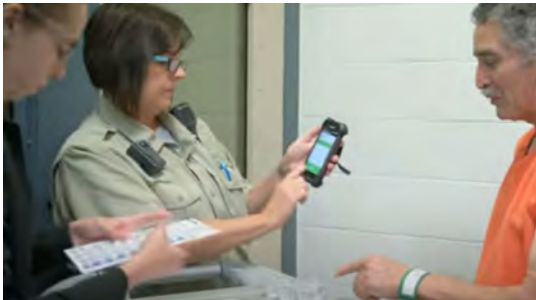

DEFENSIBLE EMARS REPORTING.

Logging pill call Accepts with inmate signature? No problem. What about logging Declines during pill call? We got you covered.

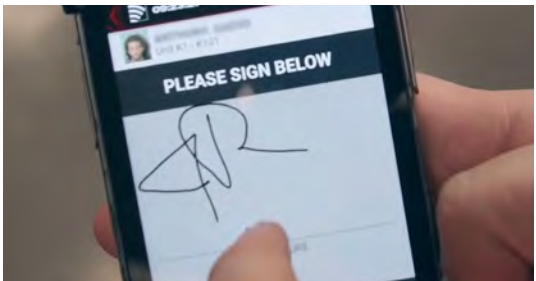

MANAGING MEDICATION ADMINISTRATION

Create electronic medication orders from anywhere, on any device, which auto-syncs to Mobile Command. Every medication administration record is stored in the GUARDIAN RFID Cloud for real-time and historical reporting.

LOGGING MEDICATION ADMINISTRATION

Medical or corrections staff can jointly administer medication requirements based on administration time. From knowing dosage levels, to route frequency, and time of administration, you can scan or select the inmate and their medication needs quickly and securely. Medication administration records are stored for real-time and historical reporting.

LOG PILL CALL ACCEPTS AND DECLINES WITH INMATE SIGNATURE

Scan an inmate's RFID card or wristband to bring up inmate specific information. Log whether offenders Accept or Decline pill call. You can scan an inmate's RFID card or RFID wristband, or manually swipe accepts and declines.

GUARDIAN RFID WARRIOR: BUFFALO COUNTY, NE

Med staff and CO's work together during med passes. Officer's handle the logging within the SPARTAN, and med staff uses OnDemand to track inventory, medication entry, medication roster, medication orders and more.
