

HARD TAGS

Offender-level identification and data collection.

IDENTIFY, CAPTURE, AND PROTECT WITH GUARDIAN RFID HARD TAGS.

DATA COLLECTION THROUGHOUT FACILITY

WHAT ARE HARD TAGS?

Hardened RFID sensors strategically deployed throughout a jail, prison, or juvenile detention facility. Hard Tags are non-hardwired and flexible to deploy. No power supply necessary, and no batteries to replace.

Bulletproof, tamper proof, and impossible to electronically manipulate. Hard Tags are also waterproof and built to survive in extreme temperatures.

WHAT ARE HARD TAGS USED FOR?

Hard Tags are commonly used as Cell Tags, Run Tags, and Pod Tags throughout a facility. We don't limit usage, so they are also frequently used for logging perimeter checks, key checks, and frequently visited out of cell locations such as kitchen, laundry, rec, law library, or even fish feeding checks (yes that's a thing).

PROGRAMMABLE TO MEET COMPLIANCE SCHEDULES.

Hard Tags can be programmed to be turned on/off during certain times of the day depending on your facility's compliance needs. Use the Compliance Monitor to verify checks are being done in certain areas at certain times.
