Jail Audit and Assessment

Why do I need a Jail Audit and Assessment?

Having our Corrections Services Team perform an outside and independent Jail Audit and Assessment of your jail can protect your agency from liability and keep officers and inmates safer. It is a great tool to improve efficiencies, facilities and operational policies. It can be used to validate staffing needs and how increased staff can improve your jail operations and safety. It confirms your compliance with state and federal mandates. Importantly, by going outside of your agency to receive an independent, professional and diverse evaluation, it shows your own due diligence to seek accountability so that your citizens have confidence in your agency. Every agency is one incident away from a national incident. Be prepared!
