

RhinoTab[®] UltraRugged[™] MDT Ultimate Motor Solution

Specialized solution puts officer safety first

- When mount is fully deployed, the MDT tablet rises above waist level enabling the officer to control the scene and fulfill critical functions from a standing position while maintaining peripheral vision
- System incorporates the brightest and toughest water-resistant touchscreen on the market, affording clear visibility in all conditions
- Embedded LTE modem, 2D scanner and bezel-mounted controls for seamless connectivity and easy, intuitive access to critical functions
- Coming soon! Our new compact Thumb Keyboard gives motor officers a wireless, free standing option for data entry and program launching

Purpose-built for first responders and proudly Made in the USA

- No universal mounts. Every component is designed and engineered for the motorcycle to ensure precisely located, safe and rattle free installation
- Unit can be positioned to officer preference in the tour pack – to the rear, right or left side of the motorcycle
- Mounting base is designed to fit over/around console and cabling, facilitating simple installation and access to peripherals such as printer and radio gear
