

Data Tracking Management Software

We offer software framework that can be modified to help with all of your project management needs including: Evidence Management, Land Management, Construction Project management, Land Services, Maintenance Management, and more.

The cloud based software operates on your Smart Phone, tablet, desktop, and laptop and works on all current system platforms; windows, mac android & ios.

In real time, information can be gathered and shared between all parties with access permissions creating ease of workflow, reducing paper, personnel, time and costs. The ease of use for this software is what makes a step above our competitors.
