

CLEAN ENERGY FOR CLEAN MOBILITY

Introducing the iSun Palm Energy and EV Charging Energy HUB. The coolest, smartest solar power canopy and EV charging investment you'll make for your public and private sites!

SOLAR POWERED EV CHARGING

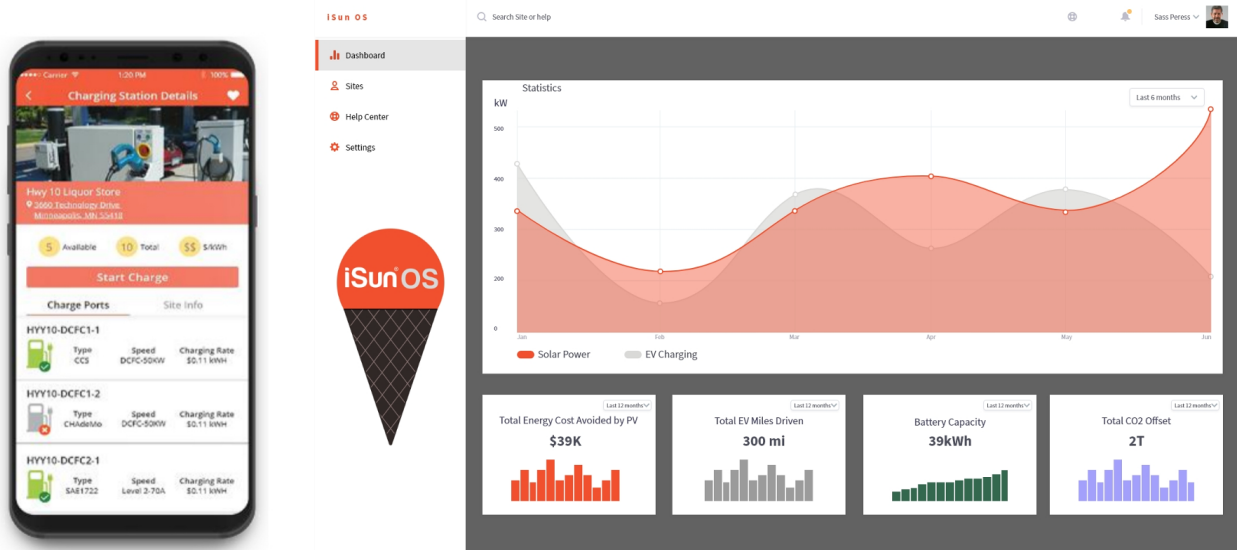

Think Clean Energy, Think iSun

Our modular unit designed solar parking lot canopy allows decision-makers to build a tailored solar array around your site or utility's particular needs and desires without sacrificing the usability of your parking spaces... and all while promoting your utility's continual sustainability efforts, greening, and protecting your fleet vehicles, while offsetting your monthly electric bill with clean solar energy!

Think Smart Sensors, Smart City.

Valuable information and control

Lead by example!

Consumers are done talking about sustainability. They want action and are looking for utilities to interact with that obviously "walk the talk" of sustainability. The iSun Palm can be configured to fit your branding via several colour options and customizable signage ideas. The iSun OS mobile app can even be a branded experience to continue to promote your brand.
