SOLAR POWERED DATA AND MOBILE CHARGING

Software Overview

iSun offers a variety of platforms, both customer and organization facing that allow for unparalleled access to key data metrics through an array of sensors. With a mobile app, track the data of your smart benches from anywhere in the world. Our customer facing landing pages can be set up with advertisements and organization information to generate income. An online dashboard places all of your key information in one, easy-to-view platform.

- Air quality, noise, humidity, battery status data collection
 - Sensors transfer data to your mobile portal, dashboard, and landing page
- Landing page advertising and branding possibilities
 - Customize your Wi-Fi landing page to include advertisements and information
- Dashboard and data management
 - Track the data of your smart benches from anywhere in the world

Lead by example!

Citizens are done talking about sustainability. In this time of increased sensitivity about the reduction of pollutants that hurt our health and planet, they want action, and are looking for cities to “walk the talk” of sustainability.

Grow as your needs grow!

The iSun Oasis Smart Solar Bench starts at \$4,999 and includes all hardware and software options. Branding of portal, bench, installation, monthly management and annual maintenance options available.
