ITL Solutions	CRISTANINI / MINIFIRESTOP MOTORCYCLE	Piaggio MP3 500 Scooter/ Model # 880030004		\$65,975.00	6%	6%	6%	The FIRE STOP 200/30 is The FIRE STOP 200/30 thus acts both by cooling and by smothering the fire. One of the most important aspects of Water Mist technology is the reduction to a minimum of the water used to extinguish a fire. With the traditional extinguishing systems (hydrants, hoses etc.), a large amount of water has to be used, which often flows towards the lower floors, creating great damage and contamination of large surface areas and volumes. The FIRE STOP 200/30 can also use foam or other extinguishing or retardant agents which increase its extinguishing capacity even more. The quantity of extinguishing product can be adjusted on both systems of aspiration, at high and low pressure. An aspiration device is placed on the water line at the entrance of the high pressure pump and a second aspiration device is situated on the high pressure line, after the pump. Price includes shipping from Italy to Hampton, Va for commissioning and forwarding to final destination.
